MIT-WPU | Faculty of Engineering and Technology

End Course Survey

Programme Name	B.Tech (CSE-CSF)	Academic Year	2026-27
Course Name	Data Structures	Class	S. Y.
Course Code	CSF20020	Semester	III

Course Outcomes:

After completion of this course students will be able to:

1. To demonstrate the use of sequential data structures
2. To analyse different sorting algorithms so as to understand their applications
3. To develop skills for writing and analysing algorithms to solve domain problems.
4. To choose appropriate non-linear data structures to solve a given problem

Indirect Assessment: End Course Survey (To be filled by students)

Sr. No	Relevance to CO	Questions	Yes	Maybe	No
Section A: Course Learning Outcomes					
1	CO1, CO4	Are you able to understand the meaning of linear data structure & nonlinear data structures?	✓		
2		Are you able to select the appropriate data structure to solve problem?	✓		
3		Are you able to implement the concept of a sparse matrix?	✓		
4	CO1, CO2, CO3,CO4	Are you able to understand & use different types of searching techniques such as linear search, sentinel search and binary search?	✓		
5		Are you able to understand and implement bubble, selection, and insertion sort?	✓		
6		Are you able to compare bubble, selection, insertion, merge sort, quick sort, shell sort, bucket sort and radix sort and their complexity?	✓		
7		Are you able to Understand & select appropriate non-linear data structures to solve problems?	✓		
8	CO1, CO3, CO4	Do you understand two ways of organization: sequential and linked?	✓		
9		Are you able to implement stack and queue data structures using sequential organization?	✓		
10		Are you able to implement different types of Linked Lists using linked organization?	✓		

MIT-WPU | Faculty of Engineering and Technology

Section B: Course Design and Relevance					
1		The course developed my ability to write algorithms for solving domain-specific problems.	✓		
2		The course improved my ability to analyse algorithms in terms of their correctness and efficiency.	✓		
3		The course helped me select appropriate and efficient data structures for solving Computer Engineering problems.	✓		
Section C: Open-Ended Questions (Optional)					
1		What difficulties did you face while learning or implementing data structures and algorithms?	NA		
2		What support would have helped you overcome them?	NA		
3		What suggestions would you offer to improve the overall design, delivery relevance of this course?	NA

End Course Survey

Programme Name	B.Tech (CSE- CSF)	**Academic Year**	2026-27
Course Name	Data Structures Laboratory	**Class**	Second Year
Course Code	CSF20030	**Semester**	III

Course Outcomes

1. To demonstrate the use of sequential data structures
2. To analyse different sorting algorithms so as to understand their applications
3. To develop skills for writing and analysing algorithms to solve domain problems.
4. To choose appropriate non-linear data structures to solve a given problem.

Indirect Assessment: End Course Survey (To be filled by students)

Sr. No.	Relevance to CO	Questions *After completion of the DSL course…*	Yes	Maybe	No
Section A: Course Learning Outcomes					
1	CO1, CO4	Are you able to select the appropriate data structure to solve problem?	✓		
2		Are you able to implement the concept of a sparse matrix?	✓		
3		Are you able to apply appropriate data structures to solve problems?	✓		
4		Are you able to develop modular programs using functions?	✓		
5	CO2	Are you able to use different types of searching techniques such as linear search, sentinel search and binary search?	✓		
6		Are you able to understand and implement bubble, selection, and insertion sort?	✓		
7		Are you able to compare bubble, selection, insertion, merge sort, quick sort, shell sort, bucket sort and radix sort and their complexity?	✓		
8		Are you able to select appropriate searching and sorting technique to solve problem?	✓		
9	CO3	Are you able to implement stack operations and apply it to solve problems?	✓		
10		Are you able to implement different types of Linked Lists using linked organization?	✓		

11		Are you able to implement queue operations and apply it for real time applications?	✓		
12		Are you able to solve real life problems by selecting and implemented appropriate data structure?	✓		
Section B: Course Delivery and Learning Experience					
13		The lab sessions helped me understand data structures concepts clearly.	✓		
14		The lab sessions improved my problem-solving skills.	✓		
15		The experiments were well-designed and relevant to the course.	✓		
16		The course improved my logical and analytical thinking.	✓		
17		Overall, the course was useful and effective.	✓		
Section C: Open-Ended Questions (Optional while filling survey)					
18		What aspects of the course did you find most useful?		NA	
19		What difficulties did you face during the lab sessions?		NA	
20		Suggest improvements for this course		NA
